

What is development?

Development is an improvement in living standards through better use of resources.

| | |
|----------------------|--|
| Economic | This is progress in economic growth through levels of industrialisation and use of technology. |
| Social | This is an improvement in people's standard of living. For example, clean water and electricity. |
| Environmental | This involves advances in the management and protection of the environment. |

Measuring development

These are used to compare and understand a country's level of development.

Economic indicators examples

| | |
|--|---|
| Employment type | The proportion of the population working in primary, secondary, tertiary and quaternary industries. |
| Gross Domestic Product per capita | This is the total value of goods and services produced in a country per person, per year. |
| Gross National Income per capita | An average of gross national income per person, per year in US dollars. |

Social indicators examples

| | |
|-------------------------|---|
| Infant mortality | The number of children who die before reaching 1 per 1000 babies born. |
| Literacy rate | The percentage of population over the age of 15 who can read and write. |
| Life expectancy | The average lifespan of someone born in that country. |

Mixed indicators

| | |
|--------------------------------------|--|
| Human Development Index (HDI) | A number that uses life expectancy, education level and income per person. |
|--------------------------------------|--|

Variations in the level of development

| | |
|-------------|--|
| LICs | Poorest countries in the world. GNI per capita is low and most citizens have a low standard of living. |
| NEEs | These countries are getting richer as their economy is progressing from the primary industry to the secondary industry. Greater exports leads to better wages. |
| HICs | These countries are wealthy with a high GNI per capita and standards of living. These countries can spend money on services. |

Causes of uneven development

Development is globally uneven with most HICs located in Europe, North America and Oceania. Most NEEs are in Asia and South America, whilst most LICs are in Africa. Remember, development can also vary within countries too.

Unit 2b

The Changing Economic World

Physical factors affecting uneven development

| | |
|--|---|
| Natural Resources <ul style="list-style-type: none"> Fuel sources such as oil. Minerals and metals for fuel. Availability for timber. Access to safe water. | Natural Hazards <ul style="list-style-type: none"> Risk of tectonic hazards. Benefits from volcanic material and floodwater. Frequent hazards undermines redevelopment. |
| Climate <ul style="list-style-type: none"> Reliability of rainfall to benefit farming. Extreme climates limit industry and affects health. Climate can attract tourists. | Location/Terrain <ul style="list-style-type: none"> Landlocked countries may find trade difficulties. Mountainous terrain makes farming difficult. Scenery attracts tourists. |

Human factors affecting uneven development

| | |
|---|---|
| Aid <ul style="list-style-type: none"> Aid can help some countries develop key projects for infrastructure faster. Aid can improve services such as schools, hospitals and roads. Too much reliance on aid might stop other trade links becoming established. | Trade <ul style="list-style-type: none"> Countries that export more than they import have a trade surplus. This can improve the national economy. Having good trade relationships. Trading goods and services is more profitable than raw materials. |
| Education <ul style="list-style-type: none"> Education creates a skilled workforce meaning more goods and services are produced. Educated people earn more money, meaning they also pay more taxes. This money can help develop the country in the future. | Health <ul style="list-style-type: none"> Lack of clean water and poor healthcare means a large number of people suffer from diseases. People who are ill cannot work so there is little contribution to the economy. More money on healthcare means less spent on development. |
| Politics <ul style="list-style-type: none"> Corruption in local and national governments. The stability of the government can effect the country's ability to trade. Ability of the country to invest into services and infrastructure. | History <ul style="list-style-type: none"> Colonialism has helped Europe develop, but slowed down development in many other countries. Countries that went through industrialisation a while ago, have now develop further. |

Consequences of Uneven Development

Levels of development are different in different countries. This uneven development has consequences for countries, especially in wealth, health and migration.

| | |
|------------------|--|
| Wealth | People in more developed countries have higher incomes than less developed countries. |
| Health | Better healthcare means that people in more developed countries live longer than those in less developed countries. |
| Migration | If nearby countries have higher levels of development or are secure, people will move to seek better opportunities and standard of living. |

The Demographic Transition Model

The demographic transition model (DTM) shows population change over time. It studies how birth rate and death rate affect the total population of a country.

| STAGE 1 | STAGE 2 | STAGE 3 | STAGE 4 | STAGE 5 |
|------------------------------|-------------------------------------|--------------------------------------|--------------------------|---|
| High DR High BR Steady | BR Low Declining DR Very High | Rapidly falling DR Low BR High | Low DR Low BR Zero | Slowly Falling DR Low BR Negative |
| e.g. Tribes | e.g. Kenya | e.g. India | e.g. UK | e.g. Japan |

Reducing the Global Development Gap

Microfinance Loans

This involves people in LICs receiving smalls loans from traditional banks.
 + Loans enable people to begin their own businesses
 - Its not clear they can reduce poverty at a large scale.

Foreign-direct investment

This is when one country buys property or infrastructure in another country.
 + Leads to better access to finance, technology & expertise.
 - Investment can come with strings attached that country's will need to comply with.

Aid

This is given by one country to another as money or resources.
 + Improve literacy rates, building dams, improving agriculture.
 - Can be wasted by corrupt governments or they can become too reliant on aid.

Fair trade

This is a movement where farmers get a fair price for the goods produced.
 + Paid fairly so they can develop schools & health centres.
 -Only a tiny proportion of the extra money reaches producers.

Debt Relief

This is when a country's debt is cancelled or interest rates are lowered.
 + Means more money can be spent on development.
 - Locals might not always get a say. Some aid can be tied under condition from donor country.

Technology

Includes tools, machines and affordable equipment that improve quality of life.
 + Renewable energy is less expensive and polluting.
 - Requires initial investment and skills in operating technology

CS: Reducing the Development Gap In Jamaica

Location and Background

Jamaica is a LIC island nation part of the Caribbean. Location makes Jamaica an attractive place for visitors to explore the tropical blue seas, skies and palm filled sandy beaches

Tourist economy

-In 2015, 2.12 million visited.
 -Tourism contributes 27% of GDP and will increase to 38% by 2025.
 -130,000 jobs rely on tourism.
 -Global recession 2008 caused a decline in tourism. Now tourism is beginning to recover.

Multiplier effect

-Jobs from tourism have meant more money has been spent in shops and other businesses.
 -Government has invested in infrastructure to support tourism.
 -New sewage treatment plants have reduced pollution.

Development Problems

- Tourists do not always spend much money outside their resorts.
- Infrastructure improvements have not spread to the whole island.
- Many people in Jamaica still live in poor quality housing and lack basic services such as healthcare.

Case Study: Economic Development in Nigeria

Location & Importance

Nigeria is a NEE in West Africa. Nigeria is just north of the Equator and experiences a range of environments.
 Nigeria is the most populous and economically powerful country in Africa. Economic growth has been base on oil exports.

Influences upon Nigeria's development

Political

Suffered instability with a civil war between 1967-1970. From 1999, the country became stable with free and fair elections. Stability has encouraged global investment from China and USA.

Social

Nigeria is a multi-cultural, multi-faith society. Although mostly a strength, diversity has caused regional conflicts from groups such as the Boko Haram terrorists.

Cultural

Nigeria's diversity has created rich and varied artistic culture. The country has a rich music, literacy and film industry (i.e. Nollywood). A successful national football side.

Industrial Structures

Once mainly based on agriculture, 50% of its economy is now manufacturing and services. A thriving manufacturing industry is increasing foreign investment and employment opportunities.

The role of TNCs

TNCs such as Shell have played an important role in its economy.
 + Investment has increased employment and income.
 - Profits move to HICs.
 - Many oil spills have damaged fragile environments.

Changing Relationships

Nigeria plays a leading role with the African Union and UN. Growing links with China with huge investment in infrastructure. Main import includes petrol from the EU, cars from Brazil and phones from China.

Environmental Impacts

The 2008/09 oil spills devastated swamps and its ecosystems. Industry has caused toxic chemicals to be discharged in open sewers - risking human health. 80% of forest have been cut down. This also increases CO² emissions.

Aid & Debt relief

+ Receives \$5billion per year in aid. + Aid groups (ActionAid) have improved health centres, provided anti-mosquito nets and helped to protect people against AIDS/HIV.
 - Some aid fails to reach the people who need it due to corruption.

Effects of Economic Development

Life expectancy has increased from 46 to 53 years. 64% have access to safe water. Typical schooling years has increased from 7 to 9.

Case Study: Economic Change in the UK

UK in the Wider World

The UK has one of the largest economies in the world. The UK has huge political, economic and cultural influences. The UK is highly regarded for its fairness and tolerance. The UK has global transport links i.e. Heathrow and the Eurostar.

Causes of Economic Change

De-industrialisation and the decline of the UK's industrial base. Globalisation has meant many industries have moved overseas, where labour costs are lower. Government investing in supporting vital businesses.

Towards Post-Industrial

The quaternary industry has increased, whilst secondary has decreased. Numbers in primary and tertiary industry has stayed the steady. Big increase in professional and technical jobs.

Cambridge Science Park

A major quaternary industry on the outskirts. Good transport access to the A14 and M11. A good location for sourcing highly educated workers from Cambridge University. Staff benefit from attractive working conditions. Attracts clusters of related high-tech businesses.

Change to a Rural Landscape - South Cambridgeshire

Cambridge is one of the fastest growing cities in the UK. Current population is 155,000 but will increase to 175,000 by 2026.

Social

Rising house prices have caused tensions in villages. Villages are unpopulated during the day causing loss of identity. Resentment towards poor migrant communities.

Economic

Lack of affordable housing for local first time buyers. Sales of farmland has increased rural unemployment. Influx of poor migrants puts pressures on local services.

Improvements to Transport

A £15 billion 'Road Improvement Strategy'. This will involve 10 new roads and 1,600 extra lanes. £50 billion HS2 railway to improve connections between key UK cities. £18 billion on Heathrow's controversial third runway. UK has many large ports for importing and exporting goods.

UK North/South Divide

- Wages are lower in the North.
 - Health is better in the South.
 - Education is worse in the North.
 + The government is aiming to support a Northern Powerhouse project to resolve regional differences.
 + More devolving of powers to disadvantaged regions.
